## SOFTWARE ENGINEER

A diligent, resourceful and highly motivated professional with a comprehensive software engineering background. Proven expertise in resolving bugs; adjusting server configurations; and maintaining development and production Linux-based servers. Recognized for strong proficiency in developing websites, as well as excellent analytical abilities in troubleshooting complex problems. Technical expertise in implementing HTML, CSS and JavaScript modules. Language fluency in Spanish and Hebrew.

### AREAS OF EXPERTISE

---

- Software Engineering
  - Server Maintenance
  - Website Development
  - Full Stack Development
  - Server Configurations
  - Front End/Back End Redesign
  - 3D Computer Model Design
  - Troubleshooting
  - Android Applications
- 

### PROFESSIONAL EXPERIENCE

---

**CONSUMER REPORTS, YONKERS, NY** 2014 – PRESENT

**SOFTWARE ENGINEER/FULL-STACK DEVELOPER**

- Serve as a member of the main CRO (consumer reports online) team tasked with maintaining the entire website; manage all codebases and UNIX servers and provide 24/7 support for serious issues.
- Use HTML, Javascript, CSS, Apache Velocity, XML, Java and Python to manage diverse components in Adobe CQ and Pipeline code bases; function as the company's Github account administrator.
- Spearhead complete front-end/back-end redesign implementation for the website's search functionality.
- Adjust Oracle Endeca server configurations to optimize search results for queries such as 'iPad'.
- Resolve bugs and implement updates to *consumerreports.org*, a website with 3 million annual subscribers.
- Work on tickets involving front-end languages (HTML, CSS, XML and Javascript), templating languages (velocity and JSTL) and back-end languages (java and python).
- Work on tickets involving their Mashery API and backend databases.
- Provide UNIX server maintenance to the dev and prod servers involving CR's pipeline and CQ environments.
- Retain a comprehensive knowledge of the company's vast architecture technologies and environments.

**INDEPENDENT CONSULTANT, BROOKLYN, NY** 2007 – PRESENT

**DEVELOPER & WEB DESIGNER (PART-TIME)**

- Designed and developed various innovative websites, while also providing consistent site support.
- Implemented HTML, CSS and JavaScript modules.

**NYU WIRELESS WITEST LAB, BROOKLYN, NY** 2012 – 2014

**ASSISTANT PROGRAMMER (PART-TIME)**

- Assisted in the design and development of a Graphical User Interface (GUI) Python-based game.

### INTERNSHIPS

---

**YUBITECH TECHNOLOGIES, HADERA, ISRAEL** 2011

- Contributed to the software development of an Android application used for remote database access.
  - Implemented Java modules and XML schemas for data and UI functionality.
- 

### EDUCATION & TRAINING

---

**Bachelor of Science, Computer Science**, NYU Polytechnic School of Engineering, Brooklyn, NY, 2014  
**Training:** C Programming, Advanced Physics, Electronic Logic Gates Design and Software Design

### SOFTWARE DEVELOPMENT PROFICIENCY

---

Java, C++, Python, HTML5, CSS and JavaScript, JQuery, XML, Angular.JS, backbone.JS, bootstrap
